Target Details

Target:	Parvin alpha (PARVA)
Alternative Name:	Parva (PARVA Products)
Background:	This gene encodes a member of the parvin family of actin-binding proteins. Parvins are associated with focal contacts and contain calponin homology domains that bind to actin filaments. The encoded protein is part of the integrin-linked kinase signaling complex and plays a role in cell adhesion, motility and survival.
Molecular Weight:	42.1 kDa
