| Uverview                      |  |
|-------------------------------|--|
| Quantity:                     | 20 μg  |
| Target:                       | PCBP4  |
| Protein Characteristics:      | Transcript Variant 4   |
| Origin:                       | Human  |
| Source:                       | HEK-293 Cells  |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This PCBP4 protein is labelled with Myc-DYKDDDDK Tag.  |
| Application:                  | Antibody Production (AbP), Standard (STD)  |
| Product Details               |  |
| Characteristics:              | <ul> <li>Recombinant human PCBP4 (transcript variant 4) protein expressed in HEK293 cells.</li> <li>Produced with end-sequenced ORF clone</li> </ul> |
| Purity:                       | > 80 % as determined by SDS-PAGE and Coomassie blue staining   |
| Target Details                |  |
| Target:                       | PCBP4  |
| Alternative Name:             | Pcbp4 (PCBP4 Products)   |
| Background:                   | This gene encodes a member of the KH-domain protein subfamily. Proteins of this subfamily,   |
|                               | also referred to as alpha-CPs, bind to RNA with a specificity for C-rich pyrimidine regions. Alpha-  |
|                               | CPs play important roles in post-transcriptional activities and have different cellular  |
|                               | distributions. This gene is induced by the p53 tumor suppressor, and the encoded protein can   |

## **Target Details**

| suppress cell proliferation by inducing apoptosis and cell cycle arrest in G(2)-M. This gene's  |  |
|---|--|
| protein is found in the cytoplasm, yet it lacks the nuclear localization signals found in other |  |
| subfamily members. Multiple alternatively spliced transcript variants have been described, but  |  |
| the full-length nature for only some has been determined.                                       |  |

| Molecular Weight: | 41.3 kDa |
|-------------------|----------|
|                   |          |

NCBI Accession: NP\_127503

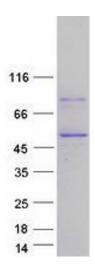

## **Application Details**

| Application Notes: | Recombinant human proteins can be used for:          |
|--------------------|--|
|                    | Native antigens for optimized antibody production    |
|                    | Positive controls in ELISA and other antibody assays |
| Comment:           | The tag is located at the C-terminal.                |
| Restrictions:      | For Research Use only                                |

## Handling

| Concentration:   | 50 μg/mL  |
|------------------|---|
| Buffer:          | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.  |
| Storage:         | -80 °C  |
| Storage Comment: | Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended. |
