Overview

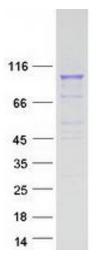

Image

Tag)

Overview	
Quantity:	20 µg
Target:	PCDHGA2
Protein Characteristics:	Transcript Variant 2
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This PCDHGA2 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human PCDHGA2 (transcript variant 2) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	PCDHGA2
Alternative Name:	Pcdhga2 (PCDHGA2 Products)
Background:	This gene is a member of the protocadherin gamma gene cluster, one of three related clusters
	tandemly linked on chromosome five. These gene clusters have an immunoglobulin-like
	organization, suggesting that a novel mechanism may be involved in their regulation and
	expression. The gamma gene cluster includes 22 genes divided into 3 subfamilies. Subfamily A

	contains 12 genes, subfamily B contains 7 genes and 2 pseudogenes, and the more distantly
	related subfamily C contains 3 genes. The tandem array of 22 large, variable region exons are
	followed by a constant region, containing 3 exons shared by all genes in the cluster. Each
	variable region exon encodes the extracellular region, which includes 6 cadherin ectodomains
	and a transmembrane region. The constant region exons encode the common cytoplasmic
	region. These neural cadherin-like cell adhesion proteins most likely play a critical role in the
	establishment and function of specific cell-cell connections in the brain. Alternative splicing has
	been described for the gamma cluster genes.
Molecular Weight:	87 kDa
NCBI Accession:	NP_114398
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Handling	
Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
