Target Details

Target:	PEX6
Alternative Name:	Peroxin 6, pex6 (PEX6 Products)
Background:	This gene encodes a member of the AAA (ATPases associated with diverse cellular activities) family of ATPases. This member is a predominantly cytoplasmic protein, which plays a direct role in peroxisomal protein import and is required for PTS1 (peroxisomal targeting signal 1, a C-terminal tripeptide of the sequence ser-lys-leu) receptor activity. Mutations in this gene cause peroxisome biogenesis disorders of complementation group 4 and complementation group 6.

Target Details

Several transcript variants encoding different isoforms have been found for this gene.

Molecular Weight: 103.9 kDa

NCBI Accession: [NP_000278](#)

Application Details

Application Notes: Recombinant human proteins can be used for:
Native antigens for optimized antibody production
Positive controls in ELISA and other antibody assays

Comment: The tag is located at the C-terminal.
