## Datasheet for ABIN2729223 PMS2 Protein (Transcript Variant 1) (Myc-DYKDDDDK Tag)

Image

Overview	
Quantity:	20 µg
Target:	PMS2
Protein Characteristics:	Transcript Variant 1
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This PMS2 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	<ul> <li>Recombinant human PMS2 (transcript variant 1) protein expressed in HEK293 cells.</li> <li>Produced with end-sequenced ORF clone</li> </ul>
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	PMS2
Alternative Name:	Pms2 (PMS2 Products)
Background:	The protein encoded by this gene is a key component of the mismatch repair system that functions to correct DNA mismatches and small insertions and deletions that can occur during DNA replication and homologous recombination. This protein forms heterodimers with the gene product of the mutL homolog 1 (MLH1) gene to form the MutL-alpha heterodimer. The

## Target Details

	MutL-alpha heterodimer possesses an endonucleolytic activity that is activated following
	recognition of mismatches and insertion/deletion loops by the MutS-alpha and MutS-beta
	heterodimers, and is necessary for removal of the mismatched DNA. There is a
	DQHA(X)2E(X)4E motif found at the C-terminus of the protein encoded by this gene that forms
	part of the active site of the nuclease. Mutations in this gene have been associated with
	hereditary nonpolyposis colorectal cancer (HNPCC also known as Lynch syndrome) and Turcot
	syndrome.
Molecular Weight:	95.6 kDa
NCBI Accession:	NP_000526
Pathways:	DNA Damage Repair, Production of Molecular Mediator of Immune Response
Application Details	
Application Details Application Notes:	Recombinant human proteins can be used for:
	Recombinant human proteins can be used for: Native antigens for optimized antibody production
	Native antigens for optimized antibody production
Application Notes:	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays
Application Notes: Comment: Restrictions:	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal.
Application Notes: Comment:	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal.
Application Notes: Comment: Restrictions:	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal.

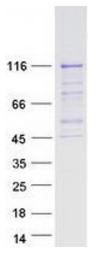

Storage Comment:

Storage:

-80 °C

immediately. Only 2-3 freeze thaw cycles are recommended.

Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze

Western Blotting

Image 1. Validation with Western Blot
