Target Details

Target:	Podocan (PODN)
Alternative Name:	Podocan, podn (PODN Products)
Background:	The protein encoded by this gene is a member of the small leucine-rich repeat protein family and contains an amino terminal CX3CXCX7C cysteine-rich cluster followed by a leucine-rich repeat domain. Studies suggest that this protein could function to inhibit smooth muscle cell proliferation and migration following arterial injury.
Molecular Weight:	74 kDa

Target Details

NCBI Accession: [NP_714914](#)
