## antibodies

## Datasheet for ABIN2729468 PPP1R12A Protein (Transcript Variant 1) (Myc-DYKDDDDK Tag)

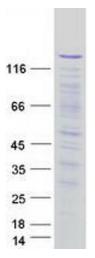

Overview

Quantity:	20 µg
Target:	PPP1R12A
Protein Characteristics:	Transcript Variant 1
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This PPP1R12A protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	<ul> <li>Recombinant human PPP1R12A / MYPT1 (transcript variant 1) protein expressed in HEK293 cells.</li> <li>Produced with end-sequenced ORF clone</li> </ul>
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	PPP1R12A
Alternative Name:	Ppp1r12a,mypt1 (PPP1R12A Products)

Background:	Myosin phosphatase target subunit 1, which is also called the myosin-binding subunit of
	myosin phosphatase, is one of the subunits of myosin phosphatase. Myosin phosphatase
	regulates the interaction of actin and myosin downstream of the guanosine triphosphatase

	Rho. The small guanosine triphosphatase Rho is implicated in myosin light chain (MLC) phosphorylation, which results in contraction of smooth muscle and interaction of actin and myosin in nonmuscle cells. The guanosine triphosphate (GTP)-bound, active form of RhoA (GTP.RhoA) specifically interacted with the myosin-binding subunit (MBS) of myosin phosphatase, which regulates the extent of phosphorylation of MLC. Rho-associated kinase (Rho-kinase), which is activated by GTP. RhoA, phosphorylated MBS and consequently
	inactivated myosin phosphatase. Overexpression of RhoA or activated RhoA in NIH 3T3 cells
	increased phosphorylation of MBS and MLC. Thus, Rho appears to inhibit myosin phosphatase
	through the action of Rho-kinase. Several transcript variants encoding different isoforms have
	been found for this gene.
Molecular Weight:	115.1 kDa
NCBI Accession:	NP_002471
Pathways:	M Phase
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Handling	
Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C

Western Blotting
