PKC gamma Protein (Myc-DYKDDDDK Tag)

Image

Go to Product page

Overview	
Quantity:	20 μg
Target:	PKC gamma (PRKCG)
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This PKC gamma protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human PRKCG protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	PKC gamma (PRKCG)
Alternative Name:	Prkcg (PRKCG Products)
Background:	Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be activated by calcium and second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways. PKC also serve as major receptors for phorbol esters, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to

been found for this gene.
spinocerebellar ataxia-14 (SCA14). Two transcript variants encoding different isoforms have
development. Defects in this protein have been associated with neurodegenerative disorder
Knockout studies in mice also suggest that this kinase may be involved in neuropathic pain
term potentiation (LTP) and long term depression (LTD), specifically require this kinase.
restricted to neurons. It has been demonstrated that several neuronal functions, including long
This protein kinase is expressed solely in the brain and spinal cord and its localization is
play distinct roles in cells. The protein encoded by this gene is one of the PKC family members.

Molecular Weight: 78.3 kDa

NCBI Accession: NP_002730

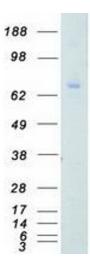

Pathways: WNT Signaling, EGFR Signaling Pathway, Neurotrophin Signaling Pathway, Thyroid Hormone Synthesis, Myometrial Relaxation and Contraction, G-protein mediated Events, Positive Regulation of Response to DNA Damage Stimulus, Interaction of EGFR with phospholipase C-gamma, Thromboxane A2 Receptor Signaling, VEGF Signaling

Application Details

Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only

Handling

Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
