PPM1B Protein (Transcript Variant 2) (Myc-DYKDDDDK Tag)

Image

| Overview | | |
|----------|--|--|
| _ | | |

| Quantity: | 20 μg |
|-------------------------------|---------------------------------------------------------------------------------|
| Target: | PPM1B |
| Protein Characteristics: | Transcript Variant 2 |
| Origin: | Human |
| Source: | HEK-293 Cells |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This PPM1B protein is labelled with Myc-DYKDDDDK Tag. |
| Application: | Antibody Production (AbP), Standard (STD) |
| Product Details | |
| Characteristics: | Recombinant human Protein phosphatase 1B / PPM1B (transcript variant 2) protein |

| Characteristics: | Recombinant human Protein phosphatase 1B / PPM1B (transcript variant 2) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone |
|------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Purity: | > 80 % as determined by SDS-PAGE and Coomassie blue staining |

Target Details

| Target: | PPM1B |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Alternative Name: | Protein Phosphatase 1b,ppm1b (PPM1B Products) |
| Background: | The protein encoded by this gene is a member of the PP2C family of Ser/Thr protein phosphatases. PP2C family members are known to be negative regulators of cell stress |
| | response pathways. This phosphatase has been shown to dephosphorylate cyclin-dependent |

Target Details

| kinases (CDKs), and thus may be involved in cell cycle control. Overexpression of this | |
|----------------------------------------------------------------------------------------------------|--|
| phosphatase is reported to cause cell-growth arrest or cell death. Alternative splicing results in | |
| multiple transcript variants encoding different isoforms. Additional transcript variants have | |
| been described, but currently do not represent full-length sequences. | |

| Molecular Weight: | 42.6 kDa |
|-------------------|----------|
|-------------------|----------|

NCBI Accession: NP_808907

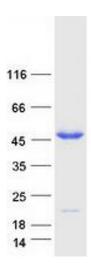

Application Details

| Application Notes: | Recombinant human proteins can be used for: |
|--------------------|------------------------------------------------------|
| | Native antigens for optimized antibody production |
| | Positive controls in ELISA and other antibody assays |
| Comment: | The tag is located at the C-terminal. |
| Restrictions: | For Research Use only |

Handling

| Concentration: | 50 μg/mL |
|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| Buffer: | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol. |
| Storage: | -80 °C |
| Storage Comment: | Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended. |
