Datasheet for ABIN2729969 PSMC4 Protein (Transcript Variant 1) (Myc-DYKDDDDK Tag)

Image

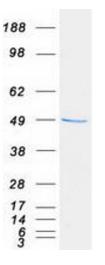

Overview	
Quantity:	20 µg
Target:	PSMC4
Protein Characteristics:	Transcript Variant 1
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This PSMC4 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human PSMC4 / TBP7 (transcript variant 1) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	PSMC4
Alternative Name:	Psmc4,tbp7 (PSMC4 Products)
Background:	The 26S proteasome is a multicatalytic proteinase complex with a highly ordered structure composed of 2 complexes, a 20S core and a 19S regulator. The 20S core is composed of 4

rings of 28 non-identical subunits 2 rings are composed of 7 alpha subunits and 2 rings are

composed of 7 beta subunits. The 19S regulator is composed of a base, which contains 6

	ATPase subunits and 2 non-ATPase subunits, and a lid, which contains up to 10 non-ATPase
	subunits. Proteasomes are distributed throughout eukaryotic cells at a high concentration and
	cleave peptides in an ATP/ubiquitin-dependent process in a non-lysosomal pathway. This gene
	encodes a member of the triple-A family of ATPases that is a component of the 19S regulatory
	subunit and plays a role in 26S proteasome assembly. The encoded protein interacts with
	gankyrin, a liver oncoprotein, and may also play a role in Parkinson&aposs disease through
	interactions with synphilin-1. Alternatively spliced transcript variants encoding multiple
	isoforms have been observed for this gene.
Molecular Weight:	47.2 kDa
NCBI Accession:	NP_006494
Pathways:	Mitotic G1-G1/S Phases, DNA Replication, Synthesis of DNA, Ubiquitin Proteasome Pathway
Application Details	
Application Notes:	Recombinant human proteins can be used for:
Application Notes:	Recombinant human proteins can be used for: Native antigens for optimized antibody production
