Target Details		
Target:	ARHGAP27	
Abstract:	ARHGAP27 Products	
Background:	This gene encodes a member of a large family of proteins that activate Rho-type guanosine	
	triphosphate (GTP) metabolizing enzymes. The encoded protein may pay a role in clathrin- mediated endocytosis. Alternatively spliced transcript variants encoding multiple isoforms have	
	mediated endocytosis. Atternatively spiloed transcript variants encountry multiple isolitinis have	

been observed for this gene.
