#### Target Details

Target:	RNF113A
Alternative Name:	Rnf113a,rnf113 ( <a href="#">RNF113A Products</a> )
Background:	This intronless gene encodes a protein which contains a C3H1-type zinc finger domain and a C3HC4 Ring-type (Really Interesting New Gene-type) zinc finger domain. The Ring-type zinc finger domain is identified in various tumor suppressors, DNA repair genes and cytokine receptor-associated molecules, and is probably involved in mediating protein-protein interactions.
