SCARB2 Protein (Myc-DYKDDDDK Tag)

\sim			
()	ve	r\/	Λ/
\cup	VC	1 V I	vv

Quantity:	20 μg	
Target:	SCARB2	
Origin:	Human	
Source:	HEK-293 Cells	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This SCARB2 protein is labelled with Myc-DYKDDDDK Tag.	
Application:	Antibody Production (AbP), Standard (STD)	
Product Details		
Characteristics:	 Recombinant human SCARB2 protein expressed in HEK293 cells. Produced with end-sequenced ORF clone 	
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining	
Target Details		
Target:	SCARB2	
Alternative Name:	Scarb2 (SCARB2 Products)	
Background:	The protein encoded by this gene is a type III glycoprotein that is located primarily in limiting membranes of lysosomes and endosomes. Earlier studies in mice and rat suggested that this protein may participate in membrane transportation and the reorganization of endosomal/lysosomal compartment. The protein deficiency in mice was reported to impair cell membrane transport processes and cause pelvic junction obstruction, deafness, and peripheral	

Target Details

neuropathy. Further studies in human showed that this protein is a ubiquitously expressed		
protein and that it is involved in the pathogenesis of HFMD (hand, foot, and mouth disease)		
caused by enterovirus-71 and possibly by coxsackievirus A16. Mutations in this gene caused an		
autosomal recessive progressive myoclonic epilepsy-4 (EPM4), also known as action		
myoclonus-renal failure syndrome (AMRF). Alternatively spliced transcript variants encoding		
different isoforms have been found for this gene.[provided by RefSeq, Feb 2011].		

Molecular Weight:

54.1 kDa

NCBI Accession:

NP_005497

Application Details

Native antigens for optimized antibody production

Positive controls in ELISA and other antibody assays

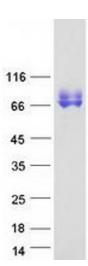

Comment: The tag is located at the C-terminal.

Restrictions: For Research Use only

Handling

Concentration:	50 μg/mL	
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.	
Storage:	-80 °C	
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze	

immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
