Target Details

Target:	SEC14L1
Alternative Name:	Sec14l1 (SEC14L1 Products)
Background:	The protein encoded by this gene belongs to the SEC14 cytosolic factor family. It has similarity to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the gene product in an intracellular transport system. Multiple alternatively spliced transcript variants have been found for this gene some variants represent read-through transcripts that include
