Datasheet for ABIN2731558 SEC14L1 Protein (Transcript Variant 3) (Myc-DYKDDDDK Tag)

Overview

Image

to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the opproduct in an intracellular transport system. Multiple alternatively spliced transcript variants		
Protein Characteristics: Transcript Variant 3 Origin: Human Source: HEK-293 Cells Protein Type: Recombinant Purification tag / Conjugate: This SEC14L1 protein is labelled with Myc-DYKDDDDK Tag. Application: Antibody Production (AbP), Standard (STD) Product Details • Recombinant human SEC14L1 (transcript variant 3) protein expressed in HEK293 cells. Characteristics: • Recombinant human SEC14L1 (transcript variant 3) protein expressed in HEK293 cells. Product Details • Produced with end-sequenced ORF clone Purity: > 80 % as determined by SDS-PAGE and Coomassie blue staining Target Details • Sec14L1 Target: SEC14L1 Alternative Name: Sec14L1 Products) Background: The protein encoded by this gene belongs to the SEC14 cytosolic factor family. It has similar to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the groduct in an intracellular transport system. Multiple alternatively spliced transcript variant system.	Quantity:	20 µg
Origin:HumanSource:HEK-293 CellsProtein Type:RecombinantPurification tag / Conjugate:This SEC14L1 protein is labelled with Myc-DYKDDDDK Tag.Application:Antibody Production (AbP), Standard (STD)Product Details.Characteristics:. Recombinant human SEC14L1 (transcript variant 3) protein expressed in HEK293 cells. . Produced with end-sequenced ORF clonePurity:>80 % as determined by SDS-PAGE and Coomassie blue stainingTarget Details.Target:SEC14L1Atternative Name:Sec14L1 Products)Background:The protein encoded by this gene belongs to the SEC14 cytosolic factor family. It has simila to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the opproduct in an intracellular transport system. Multiple alternatively spliced transcript variant	Target:	SEC14L1
Source:HEK-293 CellsProtein Type:RecombinantPurification tag / Conjugate:This SEC14L1 protein is labelled with Myc-DYKDDDDK Tag.Application:Antibody Production (AbP), Standard (STD)Product Details.Characteristics:.Recombinant human SEC14L1 (transcript variant 3) protein expressed in HEK293 cells. .Purity:> 80 % as determined by SDS-PAGE and Coornassie blue stainingTarget DetailsTarget:SEC14L1Atternative Name:SeC14L1Sec14L1 (SEC14L1 Products)Background:The protein encoded by this gene belongs to the SEC14 cytosolic factor family. It has simila to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the opproduct in an intracellular transport system. Multiple alternatively spliced transcript variant spectral	Protein Characteristics:	Transcript Variant 3
Protein Type:RecombinantPurification tag / Conjugate:This SEC14L1 protein is labelled with Myc-DYKDDDDK Tag.Application:Antibody Production (AbP), Standard (STD)Product DetailsCharacteristics:· Recombinant human SEC14L1 (transcript variant 3) protein expressed in HEK293 cells. · Produced with end-sequenced ORF clonePurity:> 80 % as determined by SDS-PAGE and Coomassie blue stainingTarget DetailsTarget:SEC14L1Alternative Name:Sec14l1 (SEC14L1 Products)Background:The protein encoded by this gene belongs to the SEC14 cytosolic factor family. It has similar to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the opproduct in an intracellular transport system. Multiple alternatively spliced transcript variant	Origin:	Human
Purification tag / Conjugate: This SEC14L1 protein is labelled with Myc-DYKDDDDK Tag. Application: Antibody Production (AbP), Standard (STD) Product Details Characteristics: Recombinant human SEC14L1 (transcript variant 3) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone Purity: > 80 % as determined by SDS-PAGE and Coomassie blue staining Target Details Target: SEC14L1 Alternative Name: Sec14L1 (SEC14L1 Products) Background: The protein encoded by this gene belongs to the SEC14 cytosolic factor family. It has simila to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the g product in an intracellular transport system. Multiple alternatively spliced transcript variants	Source:	HEK-293 Cells
Application: Antibody Production (AbP), Standard (STD) Product Details Characteristics: • Recombinant human SEC14L1 (transcript variant 3) protein expressed in HEK293 cells. • Produced with end-sequenced ORF clone Purity: > 80 % as determined by SDS-PAGE and Coomassie blue staining Target Details Target: SEC14L1 SEC14L1 Alternative Name: Sec14l1 (SEC14L1 Products) Background: The protein encoded by this gene belongs to the SEC14 cytosolic factor family. It has similar to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the groudct in an intracellular transport system. Multiple alternatively spliced transcript variant sectors.	Protein Type:	Recombinant
Product Details Characteristics: • Recombinant human SEC14L1 (transcript variant 3) protein expressed in HEK293 cells. • Produced with end-sequenced ORF clone Purity: > 80 % as determined by SDS-PAGE and Coomassie blue staining Target Details Target: SEC14L1 Alternative Name: Sec1411 (SEC14L1 Products) Background: The protein encoded by this gene belongs to the SEC14 cytosolic factor family. It has similar to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the groduct in an intracellular transport system. Multiple alternatively spliced transcript variants	Purification tag / Conjugate:	This SEC14L1 protein is labelled with Myc-DYKDDDDK Tag.
Characteristics: Recombinant human SEC14L1 (transcript variant 3) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone Purity: > 80 % as determined by SDS-PAGE and Coomassie blue staining Target Details	Application:	Antibody Production (AbP), Standard (STD)
 Produced with end-sequenced ORF clone Purity: > 80 % as determined by SDS-PAGE and Coomassie blue staining Target Details Target: SEC14L1 Alternative Name: Sec14l1 (SEC14L1 Products) Background: The protein encoded by this gene belongs to the SEC14 cytosolic factor family. It has similar to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the groduct in an intracellular transport system. Multiple alternatively spliced transcript variants 	Product Details	
Target Details Target: SEC14L1 Alternative Name: Sec14l1 (SEC14L1 Products) Background: The protein encoded by this gene belongs to the SEC14 cytosolic factor family. It has similar to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the opproduct in an intracellular transport system. Multiple alternatively spliced transcript variants	Characteristics:	
Target: SEC14L1 Alternative Name: Sec14l1 (SEC14L1 Products) Background: The protein encoded by this gene belongs to the SEC14 cytosolic factor family. It has similar to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the groduct in an intracellular transport system. Multiple alternatively spliced transcript variants	Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Alternative Name: Sec14l1 (SEC14L1 Products) Background: The protein encoded by this gene belongs to the SEC14 cytosolic factor family. It has similar to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the groduct in an intracellular transport system. Multiple alternatively spliced transcript variants	Target Details	
Background: The protein encoded by this gene belongs to the SEC14 cytosolic factor family. It has similar to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the groduct in an intracellular transport system. Multiple alternatively spliced transcript variants	Target:	SEC14L1
to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the opposite product in an intracellular transport system. Multiple alternatively spliced transcript variants	Alternative Name:	Sec14l1 (SEC14L1 Products)
	Background:	The protein encoded by this gene belongs to the SEC14 cytosolic factor family. It has similarity to yeast SEC14 and to Japanese flying squid RALBP which suggests a possible role of the gene product in an intracellular transport system. Multiple alternatively spliced transcript variants have been found for this gene some variants represent read-through transcripts that include

Target Details

	exons from the upstream gene C17orf86.
Molecular Weight:	81.1 kDa
NCBI Accession:	NP_001137470

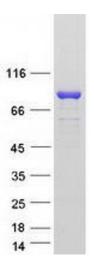

Application Details

Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only

Handling

Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.
