## Datasheet for ABIN2731710 SERF1A Protein (Transcript Variant 2) (Myc-DYKDDDDK Tag)

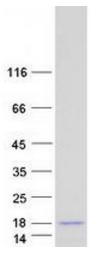

1 Image

## Overview

Quantity:	20 µg
Target:	SERF1A
Protein Characteristics:	Transcript Variant 2
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This SERF1A protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	<ul> <li>Recombinant human SERF1 (transcript variant 2) protein expressed in HEK293 cells.</li> <li>Produced with end-sequenced ORF clone</li> </ul>
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	SERF1A
Alternative Name:	Serf1 (SERF1A Products)
Background:	This gene is part of a 500 kb inverted duplication on chromosome 5q13. This duplicated region
	contains at least four genes and repetitive elements which make it prone to rearrangements
	and deletions. The repetitiveness and complexity of the sequence have also caused difficulty in
	determining the organization of this genomic region. The duplication region includes both a

	telomeric and a centromeric copy of this gene. Deletions of this gene, the telomeric copy, often
	accompany deletions of the neighboring SMN1 gene in spinal muscular atrophy (SMA) patients,
	and so it is thought that this gene may be a modifier of the SMA phenotype. The function of this
	protein is not known however, it bears low-level homology with the RNA-binding domain of
	matrin-cyclophilin, a protein which colocalizes with small nuclear ribonucleoproteins (snRNPs)
	and the SMN1 gene product. Alternatively spliced transcripts have been documented but it is
	unclear whether alternative splicing occurs for both the centromeric and telomeric copies of the
	gene.
Molecular Weight:	7.2 kDa
NCBI Accession:	NP_075257
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Handling	
Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting

Image 1. Validation with Western Blot
