SET/TAF-I Protein (Transcript Variant 2) (Myc-DYKDDDDK Tag)

Go to Product pag

1 Image

Overview	
Quantity:	20 μg
Target:	SET/TAF-I (SET)
Protein Characteristics:	Transcript Variant 2
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This SET/TAF-I protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human SET (transcript variant 2) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	SET/TAF-I (SET)
Abstract:	SET Products
Background:	The protein encoded by this gene inhibits acetylation of nucleosomes, especially histone H4, by histone acetylases (HAT). This inhibition is most likely accomplished by masking histone lysines from being acetylated, and the consequence is to silence HAT-dependent transcription. The encoded protein is part of a complex localized to the endoplasmic reticulum but is found in

Target Details

	the nucleus and inhibits apoptosis following attack by cytotoxic T lymphocytes. This protein
	can also enhance DNA replication of the adenovirus genome. Several transcript variants
	encoding different isoforms have been found for this gene.
Molecular Weight:	31.9 kDa
NCBI Accession:	NP_003002
Pathways:	Apoptosis

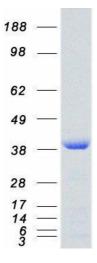

Application Details

Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only

Handling

Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.
