Datasheet for ABIN2731916 SFTPB Protein (Transcript Variant 2) (Myc-DYKDDDDK Tag)

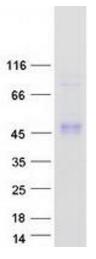

Image

Overview	
Quantity:	20 µg
Target:	SFTPB
Protein Characteristics:	Transcript Variant 2
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This SFTPB protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human SFTPB (transcript variant 2) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	SFTPB
Alternative Name:	Sftpb (SFTPB Products)
Background:	This gene encodes the pulmonary-associated surfactant protein B (SPB), an amphipathic surfactant protein essential for lung function and homeostasis after birth. Pulmonary surfactant is a surface-active lipoprotein complex composed of 90 % lipids and 10 % proteins which include plasma proteins and apolipoproteins SPA, SPB, SPC and SPD. The surfactant is

Target Details

	secreted by the alveolar cells of the lung and maintains the stability of pulmonary tissue by
	reducing the surface tension of fluids that coat the lung. The SPB enhances the rate of
	spreading and increases the stability of surfactant monolayers in vitro. Multiple mutations in
	this gene have been identified, which cause pulmonary surfactant metabolism dysfunction type
	1, also called pulmonary alveolar proteinosis due to surfactant protein B deficiency, and are
	associated with fatal respiratory distress in the neonatal period. Alternatively spliced transcript
	variants encoding the same protein have been identified.[provided by RefSeq, Feb 2010].
Molecular Weight:	39.5 kDa
NCBI Accession:	NP_942140
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Handling	
Concentration:	50 µg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
