Target Details	
Target:	SMAD1
Alternative Name:	Smad1 (SMAD1 Products)
Background:	The protein encoded by this gene belongs to the SMAD, a family of proteins similar to the gene products of the Drosophila gene 'mothers against decapentaplegic' (Mad) and the C. elegans gene Sma. SMAD proteins are signal transducers and transcriptional modulators that mediate

multiple signaling pathways. This protein mediates the signals of the bone morphogenetic
