Datasheet for ABIN2732606 Splicing Factor 1 Protein (SF1) (Transcript Variant 3) (Myc-DYKDDDDK Tag)

Overview

Quantity:	20 µg
Target:	Splicing Factor 1 (SF1)
Protein Characteristics:	Transcript Variant 3
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This Splicing Factor 1 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human Splicing factor 1 (SF1) (transcript variant 3) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	Splicing Factor 1 (SF1)
Abstract:	SF1 Products
Background:	This gene encodes a nuclear pre-mRNA splicing factor. The encoded protein specifically recognizes the intron branch point sequence at the 3' splice site, together with the large subunit of U2 auxiliary factor (U2AF), and is required for the early stages of spliceosome

Target Details

	assembly. It also plays a role in nuclear pre-mRNA retention and transcriptional repression. The encoded protein contains an N-terminal U2AF ligand motif, a central hnRNP K homology motif and quaking 2 region which bind a key branch-site adenosine within the branch point sequence, a zinc knuckles domain, and a C-terminal proline-rich domain. Alternative splicing results in multiple transcript variants.
Molecular Weight:	59.5 kDa
NCBI Accession:	NP_973727
Pathways:	Nuclear Receptor Transcription Pathway, Steroid Hormone Mediated Signaling Pathway, Ribonucleoprotein Complex Subunit Organization, Maintenance of Protein Location
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Comment: Restrictions:	Positive controls in ELISA and other antibody assays The tag is located at the C-terminal. For Research Use only
Comment: Restrictions: Handling	Positive controls in ELISA and other antibody assays The tag is located at the C-terminal. For Research Use only
Comment: Restrictions: Handling Concentration:	Positive controls in ELISA and other antibody assays The tag is located at the C-terminal. For Research Use only 50 μg/mL
Comment: Restrictions: Handling Concentration: Buffer:	Positive controls in ELISA and other antibody assays The tag is located at the C-terminal. For Research Use only 50 μg/mL 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.

Storage Comment:Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freezeimmediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
