Target Details

Target:	SYNGR2
Alternative Name:	Synaptogyrin-2,syngr2 (SYNGR2 Products)
Background:	<p>This gene encodes an integral membrane protein containing four transmembrane regions and a C-terminal cytoplasmic tail that is tyrosine phosphorylated. The exact function of this protein is unclear, but studies of a similar rat protein suggest that it may play a role in regulating membrane traffic in non-neuronal cells. The gene belongs to the synaptogyrin gene family. Alternative splicing results in multiple transcript variants.</p>
