Target Details

Target:	TBX20
Alternative Name:	Tbx20 (TBX20 Products)
Background:	This gene encodes a T-box family member. The T-box family members share a common DNA binding domain, termed the T-box, and they are transcription factors involved in the regulation of developmental processes. This gene is essential for heart development. Mutations in this gene are associated with diverse cardiac pathologies, including defects in septation,
