## Target Details

Target:	TGOLN2
Alternative Name:	Tgoln2,tgn46 ( <a href="#">TGOLN2 Products</a> )

Background:	This gene encodes a type I integral membrane protein that is localized to the trans-Golgi network, a major sorting station for secretory and membrane proteins. The encoded protein cycles between early endosomes and the trans-Golgi network, and may play a role in exocytic vesicle formation. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene.
