Product Details

Characteristics:	<ul style="list-style-type: none">• Recombinant human TIF1-gamma / TRIM33 (full length, C-term DDK tag, transcript variant a) protein expressed in Sf9 cells.• Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining

Target Details

Target:	TRIM33
Alternative Name:	Tif1-Gamma,trim33 (TRIM33 Products)
Background:	The protein encoded by this gene is thought to be a transcriptional corepressor. However, molecules that interact with this protein have not yet been identified. The protein is a member of the tripartite motif family. This motif includes three zinc-binding domains, a RING, a B-box type 1 and a B-box type 2, and a coiled-coil region. Three alternatively spliced transcript variants

Target Details

	for this gene have been described, however, the full-length nature of one variant has not been determined.
