Abstract:	TJP3 Products
Background:	The protein encoded by this gene is a member of the membrane-associated guanylate kinase- like (MAGUK) protein family which is characterized by members having multiple PDZ domains, a single SH3 domain, and a single guanylate kinase-like (GUK)-domain. In addition, members of the zonula occludens protein subfamily have an acidic domain, a basic arginine-rich region, and

	a proline-rich domain. The protein encoded by this gene plays a role in the linkage between the
	actin cytoskeleton and tight-junctions and also sequesters cyclin D1 at tight junctions during
	mitosis. Alternative splicing results in multiple transcript variants encoding distinct isoforms.
	This gene has a partial pseudogene on chromosome 1.
Molecular Weight:	104.6 kDa
NCBI Accession:	NP_055243
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
