Target Details	
Target:	TIRAP
Alternative Name:	Tirap (TIRAP Products)
Background:	The innate immune system recognizes microbial pathogens through Toll-like receptors (TLRs), which identify pathogen-associated molecular patterns. Different TLRs recognize different

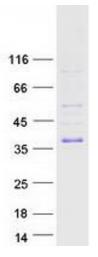

pathogen-associated molecular patterns and all TLRs have a Toll-interleukin 1 receptor (TIR)

domain, which is responsible for signal transduction. The protein encoded by this gene is a TIR

Target Details

	adaptor protein involved in the TLR4 signaling pathway of the immune system. It activates NF- kappa-B, MAPK1, MAPK3 and JNK, which then results in cytokine secretion and the inflammatory response. Alternative splicing of this gene results in several transcript variants however, not all variants have been fully described.
