Quantity:	20 μg
Target:	TRAF2
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This TRAF2 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human TRAF2 / TRAP3 protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	TRAF2
Alternative Name:	Traf2,trap3 (TRAF2 Products)
Background:	The protein encoded by this gene is a member of the TNF receptor associated factor (TRAF) protein family. TRAF proteins associate with, and mediate the signal transduction from members of the TNF receptor superfamily. This protein directly interacts with TNF receptors, and forms a heterodimeric complex with TRAF1. This protein is required for TNF-alphamediated activation of MAPK8/JNK and NF-kappaB. The protein complex formed by this

protein and TRAF1 interacts with the inhibitor-of-apoptosis proteins (IAPs), and functions as a
mediator of the anti-apoptotic signals from TNF receptors. The interaction of this protein with
TRADD, a TNF receptor associated apoptotic signal transducer, ensures the recruitment of IAPs
for the direct inhibition of caspase activation. BIRC2/c-IAP1, an apoptosis inhibitor possessing
ubiquitin ligase activity, can unbiquitinate and induce the degradation of this protein, and thus
potentiate TNF-induced apoptosis. Multiple alternatively spliced transcript variants have been
found for this gene, but the biological validity of only one transcript has been determined.

Molecular Weight: 55.7 kDa

NCBI Accession: NP_066961

Pathways:

NF-kappaB Signaling, Apoptosis, Caspase Cascade in Apoptosis, Regulation of Leukocyte

Mediated Immunity, Positive Regulation of Immune Effector Process, Production of Molecular

Mediator of Immune Response, Positive Regulation of Endopeptidase Activity, Hepatitis C,

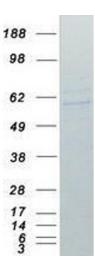

Unfolded Protein Response, S100 Proteins

Application Details

Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only

Handling

Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
