Target Details

Target:	Tricellulin (MARVELD2)
Alternative Name:	Tricellulin (MARVELD2 Products)
Background:	The protein encoded by this gene is a membrane protein found at the tight junctions between epithelial cells. The encoded protein helps establish epithelial barriers such as those in the organ of Corti, where these barriers are required for normal hearing. Defects in this gene are a cause of deafness autosomal recessive type 49 (DFNB49). Two transcript variants encoding
