Target Details

Target:	TRIM26
Alternative Name:	Trim26,rnf95 (TRIM26 Products)
Background:	<p>The protein encoded by this gene is a member of the tripartite motif (TRIM) family. The TRIM motif includes three zinc-binding domains, a RING, a B-box type 1 and a B-box type 2, and a coiled-coil region. The protein localizes to cytoplasmic bodies. Although the function of the protein is unknown, the RING domain suggests that the protein may have DNA-binding activity.</p> <p>The gene localizes to the major histocompatibility complex (MHC) class I region on</p>

Target Details

	chromosome 6. Alternatively spliced transcript variants encoding the same protein have been found for this gene.
