Datasheet for ABIN2734384 **Tropomyosin Protein (Transcript Variant 7) (Myc-DYKDDDDK Tag)**

Image

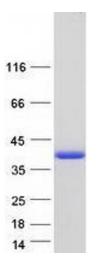

Overview

Quantity:	20 µg
Target:	Tropomyosin (TPM1)
Protein Characteristics:	Transcript Variant 7
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This Tropomyosin protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	Recombinant human Tropomyosin-1 (TPM1) (transcript variant 7) protein expressed in
	HEK293 cells.Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	Tropomyosin (TPM1)
Alternative Name:	Tropomyosin-1 (Tpm1) (TPM1 Products)
Background:	This gene is a member of the tropomyosin family of highly conserved, widely distributed actin-
	binding proteins involved in the contractile system of striated and smooth muscles and the
	cytoskeleton of non-muscle cells. Tropomyosin is composed of two alpha-helical chains

Target Details

	arranged as a coiled-coil. It is polymerized end to end along the two grooves of actin filaments
	and provides stability to the filaments. The encoded protein is one type of alpha helical chain
	that forms the predominant tropomyosin of striated muscle, where it also functions in
	association with the troponin complex to regulate the calcium-dependent interaction of actin
	and myosin during muscle contraction. In smooth muscle and non-muscle cells, alternatively
	spliced transcript variants encoding a range of isoforms have been described. Mutations in this
	gene are associated with type 3 familial hypertrophic cardiomyopathy.
Molecular Weight:	32.6 kDa
NCBI Accession:	NP_001018020
Pathways:	Regulation of Actin Filament Polymerization
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Handling	
Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
