Datasheet for ABIN2734875 UBE2V1 Protein (Transcript Variant 4) (Myc-DYKDDDDK Tag)

Overview

Image

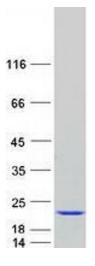

Quantity:	20 µg
Target:	UBE2V1
Protein Characteristics:	Transcript Variant 4
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This UBE2V1 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human UBE2V1 / CROC1 (transcript variant 4) protein expressed in HEK293 cells.
	Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	

Target:	UBE2V1
Alternative Name:	Ube2v1,croc1 (UBE2V1 Products)
Background:	Ubiquitin-conjugating E2 enzyme variant proteins constitute a distinct subfamily within the E2 protein family. They have sequence similarity to other ubiquitin-conjugating enzymes but lack
	the conserved cysteine residue that is critical for the catalytic activity of E2s. The protein

Target Details

	encoded by this gene is located in the nucleus and can cause transcriptional activation of the
	human FOS proto-oncogene. It is thought to be involved in the control of differentiation by
	altering cell cycle behavior. Alternatively spliced transcript variants encoding multiple isoforms
	have been described for this gene, and multiple pseudogenes of this gene have been identified.
	Co-transcription of this gene and the neighboring upstream gene generates a rare transcript
	(Kua-UEV), which encodes a fusion protein comprised of sequence sharing identity with each
	individual gene product.
Molecular Weight:	16.3 kDa
NCBI Accession:	NP_001027459
Pathways:	TCR Signaling, Fc-epsilon Receptor Signaling Pathway, Activation of Innate immune Response,
	Toll-Like Receptors Cascades
Application Details	
Application Notes:	Recombinant human proteins can be used for:
Application Notes:	Recombinant human proteins can be used for: Native antigens for optimized antibody production
Application Notes:	
Application Notes: Comment:	Native antigens for optimized antibody production
	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays
Comment:	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal.
Comment:	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal.
Comment: Restrictions:	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal.
Comment: Restrictions: Handling	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal. For Research Use only
Comment: Restrictions: Handling Concentration:	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal. For Research Use only 50 μg/mL
Comment: Restrictions: Handling Concentration: Buffer:	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal. For Research Use only 50 μg/mL 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.

Western Blotting
