

## Datasheet for ABIN2735146 USP8 Protein (Transcript Variant 2) (Myc-DYKDDDDK Tag)

Overview

Image

| Quantity:                     | 20 µg  |
|-------------------------------|--|
| Target:                       | USP8   |
| Protein Characteristics:      | Transcript Variant 2   |
| Origin:                       | Human  |
| Source:                       | HEK-293 Cells  |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This USP8 protein is labelled with Myc-DYKDDDDK Tag.   |
| Application:                  | Antibody Production (AbP), Standard (STD)  |
| Product Details               |  |
| Characteristics:              | <ul> <li>Recombinant human USP8 / UBPY (transcript variant 2) protein expressed in HEK293 cells.</li> <li>Produced with end-sequenced ORF clone</li> </ul> |
| Purity:                       | > 80 % as determined by SDS-PAGE and Coomassie blue staining   |
| Target Details                |  |
| Target:                       | USP8   |
| Alternative Name:             | Usp8,ubpy (USP8 Products)  |
| Background:                   | This gene encodes a protein that belongs to the ubiquitin-specific processing protease family of   |

proteins. The encoded protein is thought to regulate the morphology of the endosome by

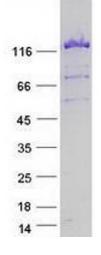

ubiquitination of proteins on this organelle and is involved in cargo sorting and membrane

trafficking at the early endosome stage. This protein is required for the cell to enter the S phase

| Target Details      |   |
|---------------------|---|
|                     | of the cell cycle and also functions as a positive regulator in the Hedgehog signaling pathway in<br>development. Pseudogenes of this gene are present on chromosomes 2 and 6. Alternate<br>splicing results in multiple transcript variants. |
| Molecular Weight:   | 127.3 kDa   |
| NCBI Accession:     | NP_001122082  |
| Application Details |   |
| Application Notes:  | Recombinant human proteins can be used for:   |
|                     | Native antigens for optimized antibody production   |
|                     | Positive controls in ELISA and other antibody assays  |
| Comment:            | The tag is located at the C-terminal.   |
| Restrictions:       | For Research Use only   |
| Handling            |   |
| Concentration:      | 50 μg/mL  |
| Buffer:             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.  |
| Storage:            | -80 °C  |
| Storage Comment:    | Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.   |
