Target Details

Target:	XYLB
Alternative Name:	Xylb,xylulokinase (XYLB Products)
Background:	The protein encoded by this gene shares 22 % sequence identity with Hemophilus influenzae xylulokinase, and even higher identity to other gene products in C.elegans (45 %) and yeast (31-35 %), which are thought to belong to a family of enzymes that include fucokinase, gluconokinase, glycerokinase and xylulokinase. These proteins play important roles in energy metabolism.

Target Details
