Overview	
Quantity:	20 μg
Target:	ZNF606
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This ZNF606 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human ZNF606 protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	ZNF606
Alternative Name:	Znf606 (ZNF606 Products)
Background:	This gene encodes a zinc finger protein containing a Kruppel-associated box (KRAB) domain at
	its N-terminus, followed by contiguous C2H2 zinc finger motifs. The encoded protein is a
	nuclear protein that can act as a transcriptional repressor of growth factor-mediated signaling
	pathways in a reporter gene assay. This protein has been shown to interact with the SRY-box 9
	gene product, and suppresses its transcriptional activity by inhibiting its DNA binding activity.

Target Details

	Reduced expression of this gene promotes chondrocyte differentiation. Alternative splicing
	results in multiple transcript variants encoding different isoforms.
Molecular Weight:	91.6 kDa
NCBI Accession:	NP_079303

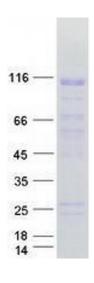

Application Details

Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only

Handling

Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.
