ZWINT Protein (Transcript Variant 1) (Myc-DYKDDDDK Tag)

Overview

Image

Go to Product page

Quantity:	20 μg
Target:	ZWINT
Protein Characteristics:	Transcript Variant 1
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This ZWINT protein is labelled with Myc-DYKDDDDK Tag.

Product Details

Application:

Characteristics:	 Recombinant human ZW10 interactor / ZWINT (transcript variant 1) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining

Antibody Production (AbP), Standard (STD)

Target Details

Target:	ZWINT
Alternative Name:	Zw10 Interactor,zwint (ZWINT Products)
Background:	This gene encodes a protein that is clearly involved in kinetochore function although an exact role is not known. It interacts with ZW10, another kinetochore protein, possibly regulating the
	association between ZW10 and kinetochores. The encoded protein localizes to prophase

Target Details

	kinetochores before ZW10 does and it remains detectable on the kinetochore until late
	anaphase. It has a uniform distribution in the cytoplasm of interphase cells. Alternatively
	spliced transcript variants encoding different isoforms have been found for this gene.
Molecular Weight:	31.1 kDa
NCBI Accession:	NP_008988

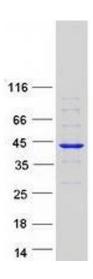

Application Details

Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only

Handling

Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.
