Target Details

Target:	IL-37 (IL37)
Alternative Name:	IL-37 (IL37 Products)
Background:	IL-37 (IL-1F7) belongs to the IL-1 family. It binds to interleukin-18 receptor (IL-18R) but not to IL-1 receptor. It was shown to play an important role as a link between innate and adaptive immunity and it is suggested as a new player in the inflammatory and immune responses mediated by the IL-18/IL-18R axis. It was also shown to inhibit tumor growth.
