Overview

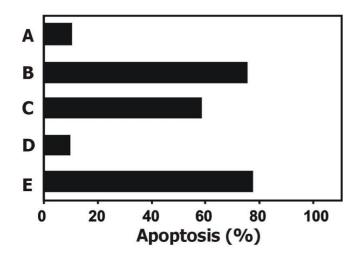

Quantity:	0.1 mg
Target:	TRAIL (TNFSF10)
Binding Specificity:	AA 95-281
Reactivity:	Human
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This TRAIL antibody is un-conjugated
Application:	Flow Cytometry (FACS), Functional Studies (Func)

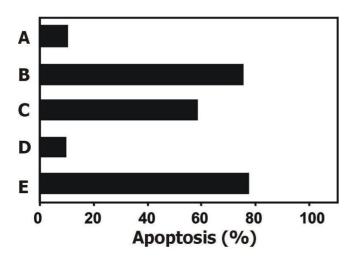

Product Details

Immunogen:	Recombinant soluble fragment (aa 95-281) of human TRAIL.
Clone:	2E5
Isotype:	lgG1
Specificity:	The antibody 2E5 reacts with an extracellular epitope within C-terminal half of TRAIL (APO-2L), a 21 kDa cytotoxic protein, activator of rapid apoptosis in tumor cells. TRAIL is mainly expressed in spleen, lung, prostate and also in many other tissues.
No Cross-Reactivity:	Mouse
Cross-Reactivity (Details):	Human
Purification:	Purified by protein-A affinity chromatography.
Purity:	> 95 % (by SDS-PAGE)

Product Details	
Endotoxin Level:	Endotoxin level is less than 0.01 EU/ μg of the protein, as determined by the LAL test.
Target Details	
Target:	TRAIL (TNFSF10)
Alternative Name:	CD253 / TRAIL (TNFSF10 Products)
Background:	TNF superfamily member 10,Human CD253 / TRAIL (TNF-related apoptosis inducing ligand), also called Apo2, is a type II membrane protein from the TNF family. TRAIL is a cytotoxic protein which activates rapid apoptosis in tumor cells, but not in normal cells. TRAIL-induced apotosis, is achieved through binding to two dealth-signaling receptors, DR4 (CD261 / TRAIL-R1) and DR5 (CD262 / TRAIL-R2).,TRAIL, Apo-2 ligand, Apo-2L, TNFSF10, APO2L, TNLG6A
Gene ID:	8743
UniProt:	P50591
Pathways:	Apoptosis, Positive Regulation of Endopeptidase Activity
Application Details	
Application Notes:	Functional application: The antibody 2E5 has high neutralizing activity for human TRAIL in biological assays. Flow cytometry: Recommended dilution: 1-10 µg/mL.
Restrictions:	For Research Use only
Handling	
Concentration:	1 mg/mL
Buffer:	Phosphate buffered saline (PBS), pH 7.4
Preservative:	Azide free
Storage:	4 °C
Storage Comment:	Store at 2-8°C. Do not freeze.

Functional Studies

Image 1. Functional application example: Apoptosis induced in JURKAT human T cell leukemia cell line by soluble recombinant human TRAIL is completely blocked by anti-human TRAIL (2E5). The neutralizing activity of the antibody 2E5 has been confirmed with various sources of soluble recombinant human TRAIL. A - medium B - recombinant TRAIL C - recombinant TRAIL + anti-human TRAIL (2E5, $0.06 \,\mu\text{g/mL}$) D - recombinant TRAIL + anti-human TRAIL (2E5, $0.24 \,\mu\text{g/mL}$) E - recombinant TRAIL + lsotype mouse IgG1 control

Apoptosis Detection

Image 2. Induction of apoptosis Apoptosis induced in JURKAT human T cell leukemia cell line by soluble recombinant human TRAIL is completely blocked by antihuman TRAIL (2E5). The neutralizing activity of the antibody 2E5 has been confirmed with various sources of soluble recombinant human TRAIL. A - medium B - recombinant TRAIL C - recombinant TRAIL + anti-human TRAIL (2E5; 0.06 μg/ml) D - recombinant TRAIL + anti-human TRAIL (2E5; 0.24 μg/ml) E - recombinant TRAIL + Isotype mouse IgG1 control
