#### Overview

| Quantity:    | 100 tests                               |
|--------------|---|
| Target:      | CD84                                    |
| Reactivity:  | Human                                   |
| Host:        | Mouse                                   |
| Clonality:   | Monoclonal                              |
| Conjugate:   | This CD84 antibody is conjugated to APC |
| Application: | Flow Cytometry (FACS)                   |

### Product Details

| Immunogen:                  | CD84-transfected 300.19 cell line   |
|-----------------------------|---|
| Clone:                      | CD84-1-21   |
| lsotype:                    | IgG2a kappa   |
| Specificity:                | The mouse monoclonal antibody CD84.1.21 recognizes an extracellular epitope of CD84, a single chain cell surface glycoprotein of 64-82 kDa, predominantly expressed B cells, monocytes, platelets and some T cells. |
| Cross-Reactivity (Details): | Human   |
| Purification:               | Purified antibody is conjugated with activated allophycocyanin (APC) under optimum conditions and unconjugated antibody and free fluorochrome are removed by size-exclusion chromatography.                         |

## Target Details

| Target:           | CD84   |
|-------------------|--|
| Alternative Name: | CD84 (CD84 Products)   |
| Background:       | CD84 Molecule,CD84 is a highly glycosylated homophilic receptor of SLAM family. It is<br>expressed on platelets and various types of leukocytes, especially following their activation.<br>Ligation of CD84 leads to its phosphorylation on tyrosine residues within the cytoplasmic tail.<br>These docking sites are recognized by downstream signaling molecules, such as phosphatase<br>SHP-2 and adaptor protein SAP/SH2D1A. The function of CD84 has not been fully elucidated<br>yet. Although predominantly activating receptor, its modulating activity was also<br>demonstrated.,LY9B, SLAMF5 |
| Gene ID:          | 8832   |
| UniProt:          | Q9UIB8   |

## Application Details

| Application Notes: | Flow cytometry: The reagent is designed for analysis of human blood cells using 10 μL reagent<br>/ 100 μL of whole blood or 10 <sup>6</sup> cells in a suspension. The content of a vial (1 ml) is sufficient for<br>100 tests. |
|--------------------|---|
| Comment:           | The purified antibody is conjugated with cross-linked Allophycocyanin (APC) under optimum conditions. The conjugate is purified by size-exclusion chromatography and adjusted for direct use. No reconstitution is necessary.   |
| Restrictions:      | For Research Use only   |
| Handling           |   |
| Buffer:            | Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide   |
| Preservative:      | Sodium azide  |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.  |
| Storage:           | 4 °C  |
| Storage Comment:   | Store at 2-8°C. Protect from prolonged exposure to light. Do not freeze.  |
