## Target Details

Alternative Name:	DDX55 ( <a href="#">DDX55 Products</a> )
Background:	<p>Anti-DDX55 encodes a member of the DEAD box protein family. DEAD box proteins, characterized by the conserved motif Asp-Glu-Ala-Asp (DEAD), are putative RNA helicases. They are implicated in a number of cellular processes involving alteration of RNA secondary structure, such as translation initiation, nuclear and mitochondrial splicing, and ribosome and spliceosome assembly. Based on their distribution patterns, some members of this family are believed to be involved in embryogenesis, spermatogenesis, and cellular growth and division. Multiple alternatively spliced transcript variants have been found for Anti-DDX55, but the biological validity of only one transcript has been confirmed.</p> <p>Protein Interaction Partner: KRTAP10-8, AGTRAP, UBC, APP, CAND1,</p> <p>Protein Size: 600</p>
