## Target Details

Target:	Activator of Basal Transcription 1 (Abt1)
Alternative Name:	ABT1 ( <a href="#">Abt1 Products</a> )

## Target Details

Background:	<p>Basal transcription of genes by RNA polymerase II requires the interaction of TATA-binding protein (TBP) with the core region of class II promoters. Studies in mouse suggest that the protein encoded by ABT1 likely activates basal transcription from class II promoters by interaction with TBP and the class II promoter DNA.</p> <p>Basal transcription of genes by RNA polymerase II requires the interaction of TATA-binding protein (TBP) with the core region of class II promoters.
