Alternative Name: VARS ([VARS Products](#))

Background: Aminoacyl-tRNA synthetases catalyze the aminoacylation of tRNA by their cognate amino acid. Because of their central role in linking amino acids with nucleotide triplets contained in tRNAs, aminoacyl-tRNA synthetases are thought to be among the first proteins that appeared in evolution. VARS belongs to class-I aminoacyl-tRNA synthetase family and is located in the class III region of the major histocompatibility complex.
