| Background:               | Synonyms: G21, HCP1, PCFT, Proton-coupled folate transporter, Heme carrier protein 1,<br>PCFT/HCP1, Solute carrier family 46 member 1, SLC46A1<br>Background: Has been shown to act both as an intestinal proton-coupled high-affinity folate<br>transporter and as an intestinal heme transporter which mediates heme uptake from the gut<br>lumen into duodenal epithelial cells. The iron is then released from heme and may be<br>transported into the bloodstream. Dietary heme iron is an important nutritional source of iron.<br>Shows a higher affinity for folate than heme. |
