Datasheet for ABIN2804424 anti-Myosin VI antibody (AA 1101-1294) (Alexa Fluor 594)

Overview

Quantity:	100 μL
Target:	Myosin VI (MYO6)
Binding Specificity:	AA 1101-1294
Reactivity:	Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This Myosin VI antibody is conjugated to Alexa Fluor 594
Application:	Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p))

Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human Myosin VI
Isotype:	lgG
Cross-Reactivity:	Mouse, Rat
Predicted Reactivity:	Human,Dog,Cow,Sheep,Pig,Horse,Rabbit
Purification:	Purified by Protein A.
Target Details	

Target:	Myosin VI (MYO6)
Alternative Name:	MY06/Myosin VI (MY06 Products)

Target Details	
Background:	Synonyms: Deafness autosomal recessive 37, DFNA 22, DFNA22, DFNB 37, DFNB37, KIAA0389,
	MYO 6, Myo6, MYO6_HUMAN, Myosin 6, Myosin VI, Myosin-VI, Myosin6, MyosinVI,
	Unconventional myosin-6.
	Background: Myosin VI a molecular motor involved in intracellular vesicle and organelle
	transport, is the only Myosin motor that binds to the pointed end of Actin. This unique Myosin
	has only one light chain in the lever-arm domain and has highly irregular stepping with a wide
	range of step sizes, unlike that of other characterized Myosins. It associates with Clathrin-
	coated vesicles and disabled 2, indicating a role for Myosin VI in endocytosis. Mouse Myosin VI
	is expressed within the sensory hair cells of the cochlea. Human Myosin VI is mapped to the
	centromeric region of chromosome 6, a region that shows syntenic homology with the
	corresponding mouse chromosome 9 region, where the Snell?s Waltzer mutation is located.
	The behavioral effects of the mouse Snell?s Waltzer mutation are lack of responsiveness to
	sound, hyperactivity, head tossing and circling, due to the disorganization and fusing of
	stereocilia bundles within the inner ear. Defects of Myosin VI cause autosomal dominant
	nonsyndromic sensori-neural deafness in humans. Human Myosin VI is expressed in fetal
	cochlea and brain, as well as in adult brain.

Pathways:

Sensory Perception of Sound, Dicarboxylic Acid Transport, Asymmetric Protein Localization

Application Details

Application Notes:	IF(IHC-P) 1:50-200
	IF(IHC-F) 1:50-200
	IF(ICC) 1:50-200
Restrictions:	For Research Use only

Handling

Format:	Liquid
Concentration:	1 µg/µL
Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.

Handling	
Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
Expiry Date:	12 months
