Datasheet for ABIN2804895 anti-ORC1 antibody (Alexa Fluor 594)

Overview

Overview	
Quantity:	100 μL
Target:	ORC1 (ORC1L)
Reactivity:	Human, Rat, Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This ORC1 antibody is conjugated to Alexa Fluor 594
Application:	Western Blotting (WB), Immunofluorescence (Paraffin-embedded Sections) (IF (p))
Product Details	
Immunogen:	KLH conjugated synthetic peptide derived from human ORC1L/ORC1
lsotype:	lgG
Cross-Reactivity:	Human, Mouse, Rat
Purification:	Purified by Protein A.
Target Details	
Target:	ORC1 (ORC1L)
Alternative Name:	ORC1L (ORC1L Products)
Background:	Synonyms: HSORC1, MmORC1, orc1, ORC1_HUMAN, ORC1L, Origin Recognition Complex 1,
	Origin recognition complex subunit 1 yeast homolog like, Origin recognition complex subunit 1,
	Origin recognition complex subunit 1 homolog, Origin recognition complex subunit 1 like S.
	cerevisia, Origin recognition complex subunit 1 like, Origin recognition complex subunit 1 S.

	cerevisiae homolog like, Origin recognition complex, subunit 1 like yeast, PARC1, Replication
	control protein 1.
	Background: The initiation of DNA replication is a multi-step process that depends on the
	formation of pre-replication complexes, which trigger initiation (1). Among the proteins required
	for establishing these complexes are the origin recognition complex (ORC) proteins (1). ORC
	proteins bind specifically to origins of replication where they serve as scaffold for the assembly
	of additional initiation factors (1). Human ORC subunits 1-6 are expressed in the nucleus of
	proliferating cells and tissues, such as the testis (2). ORC1 and ORC2 are both expressed at
	equivalent concentrations throughout the cell cycle, however, only ORC2 remains stably bound
	to chromatin (3,4). ORC4 and ORC6 are also expressed constantly throughout the cell cycle
	(5,6). ORC2, ORC3, ORC4 and ORC5 form a core complex upon which ORC6 and ORC1
	assemble (7,8). The formation of this core complex suggests that ORC proteins play a crucial
	role in the G1-S transition in mammalian cells (8).
Gene ID:	4998
Pathways:	Mitotic G1-G1/S Phases, DNA Replication, Synthesis of DNA
Application Details	
Application Notes:	IF(IHC-P) 1:50-200
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	1 μg/μL
Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and
	50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
Expiry Date:	12 months
