Target Details

Target:	TP53AIP1
Alternative Name:	p53AIP1 (TP53AIP1 Products)
Background:	Synonyms: P53AIP1, p53-regulated apoptosis-inducing protein 1, TP53AIP1

Target Details

Background: This gene is specifically expressed in the thymus, and encodes a protein that is
localized to the mitochondrion. The expression of this gene is inducible by p53, and it is thought
to play an important role in mediating p53-dependent apoptosis. Alternatively spliced transcript
variants encoding different isoforms have been described for this gene. [provided by RefSeq,
