## Datasheet for ABIN2805063 anti-PANK2 antibody (AA 401-500) (Alexa Fluor 594)

Overview

Quantity:	100 µL
Target:	PANK2
Binding Specificity:	AA 401-500
Reactivity:	Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This PANK2 antibody is conjugated to Alexa Fluor 594
Application:	Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p))

## Product Details

Alternative Name:

Immunogen:	KLH conjugated synthetic peptide derived from human PANK2
Isotype:	lgG
Cross-Reactivity:	Mouse
Predicted Reactivity:	Human,Rat,Dog,Cow,Pig,Horse
Purification:	Purified by Protein A.
Target Details	
Target:	PANK2

PANK2 (PANK2 Products)

Target Details	
Background:	Synonyms: Pantothenate kinase 2, mitochondrial, hPanK2, Pantothenic acid kinase 2, PANK2, C20orf48, PANK2_HUMAN
	Background: Defects in PANK2 are the cause of neurodegeneration with brain iron
	accumulation type 1 (NBIA1), also known as pantothenate kinase-associated
	neurodegeneration (PKAN) or Hallervorden-Spatz syndrome (HSS). It is an autosomal recessive
	neurodegenerative disorder associated with iron accumulation in the brain, primarily in the
	basal ganglia. Clinical manifestations include progressive muscle spasticity, hyperreflexia,
	muscle rigidity, dystonia, dysarthria, and intellectual deterioration which progresses to severe
	dementia over several years. It is clinically classified into classic, atypical, and intermediate
	phenotypes. Classic forms present with onset in the first decade, rapid progression, loss of
	independent ambulation within 15 years. Atypical forms have onset in the second decade, slow
	progression, maintenance of independent ambulation up to 40 years later. Intermediate forms
	manifest onset in the first decade with slow progression or onset in the second decade with
	rapid progression. Patients with early onset tend to also develop pigmentary retinopathy,
	whereas those with later onset tend to also have speech disorders and psychiatric features. All
	patients have the 'eye of the tiger' sign on brain MRI.Defects in PANK2 are the cause of
	hypoprebetalipoproteinemia, acanthocytosis, retinitis pigmentosa, and pallidal degeneration
	(HARP). HARP is a rare syndrome with many clinical similarities to NBIA1.
Gene ID:	80025
UniProt:	Q9BZ23
Pathways:	Ribonucleoside Biosynthetic Process
Application Details	
Application Notes:	IF(IHC-P) 1:50-200
	IF(IHC-F) 1:50-200
	IF(ICC) 1:50-200
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	1 μg/μL
Buffer:	Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.

## Handling

Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
Expiry Date:	12 months
