

## Datasheet for ABIN2811966 anti-CRTAC1 antibody (AA 301-400) (AbBy Fluor® 594)

Overview

| Quantity:            | 100 µL  |
|----------------------|---|
| Target:              | CRTAC1  |
| Binding Specificity: | AA 301-400  |
| Reactivity:          | Human   |
| Host:                | Rabbit  |
| Clonality:           | Polyclonal  |
| Conjugate:           | This CRTAC1 antibody is conjugated to AbBy Fluor® 594                           |
| Application:         | Western Blotting (WB), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |

## Product Details

| Immunogen:            | KLH conjugated synthetic peptide derived from human CRTAC1 |
|-----------------------|--|
| Isotype:              | lgG  |
| Predicted Reactivity: | Human,Mouse,Rat,Dog,Cow,Sheep                              |
| Purification:         | Purified by Protein A.                                     |

## Target Details

| Target:           | CRTAC1  |
|-------------------|---|
| Alternative Name: | CRTAC1 (CRTAC1 Products)  |
| Background:       | Synonyms: 68 kDa chondrocyte expressed protein, 68 kDa chondrocyte-expressed protein,             |
|                   | Acidic secreted protein in cartilage, ASPIC, ASPIC1, Cartilage acidic protein 1, Cartilage acidic |

|                     | protein 1 precursor, CEP 68, CEP-68, CEP68, CRAC1_HUMAN, CRTAC1, Protein CRTAC1-B,<br>W307.                 |
|---------------------|---|
|                     | Background: CRTAC1 is a 661 amino acid secreted protein. CRTAC1 is O-glycosylated and                       |
|                     | contains one EGF-like domain and four FG-GAP repeats. Up-regulated in mesenchymal stem                      |
|                     | cells undergoing chondrogenic differentiation and also by growth factor BMP-4, CRTAC1 is                    |
|                     | found in the interterritorial matrix of articular deep zone cartilage. CRTAC1 is expressed as               |
|                     | three isoforms produced by alternative splicing events. All isoforms are expressed in bone,                 |
|                     | cartilage and lung, while isoforms 1 and 2 are expressed in the brain. The gene that encodes                |
|                     | CRTAC1 maps to human chromosome 10, which contains over 800 genes and 135 million                           |
|                     | nucleotides, making up nearly 4.5 % of the human genome.  |
| Gene ID:            | 55118   |
| Application Details |   |
| Application Notes:  | IF(IHC-P) 1:50-200  |
|                     | IF(IHC-F) 1:50-200  |
|                     | IF(ICC) 1:50-200  |
| Restrictions:       | For Research Use only   |
| Handling            |   |
| Format:             | Liquid  |
| Concentration:      | 1 μg/μL   |
| Buffer:             | Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol. |
| Preservative:       | ProClin   |
| Precaution of Use:  | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be                         |
|                     | handled by trained staff only.  |
| Storage:            | -20 °C  |
| Storage Comment:    | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.                           |
| Expiry Date:        | 12 months   |
|                     |   |
