## Datasheet for ABIN2813178 anti-FBXW5 antibody (Alexa Fluor 594)

Overview

| Overview          |  |
|-------------------|--|
| Quantity:         | 100 µL   |
| Target:           | FBXW5  |
| Reactivity:       | Human, Mouse, Rat  |
| Host:             | Rabbit   |
| Clonality:        | Polyclonal   |
| Conjugate:        | This FBXW5 antibody is conjugated to Alexa Fluor 594   |
| Application:      | Western Blotting (WB), Immunofluorescence (Paraffin-embedded Sections) (IF (p))  |
| Product Details   |  |
| Immunogen:        | KLH conjugated synthetic peptide derived from human FBXW5  |
| lsotype:          | lgG  |
| Cross-Reactivity: | Human, Mouse, Rat  |
| Purification:     | Purified by Protein A.   |
| Target Details    |  |
| Target:           | FBXW5  |
| Alternative Name: | FBXW5 (FBXW5 Products)   |
| Background:       | Synonyms: F box and WD 40 domain containing protein 5, F box and WD repeat domain<br>containing 5, FBW5, FBXW5_HUMAN.<br>Background: FBXW5 is a member of the F-box protein family, members of which are<br>characterized by an approximately 40 amino acid motif, the F-box. The F-box proteins |

|                     | constitute one of the four subunits of ubiquitin protein ligase complex called SCFs (SKP1-cullin-                  |
|---------------------|--|
|                     | F-box), which function in phosphorylation-dependent ubiquitination. The F-box proteins are                         |
|                     | divided into three classes: Fbws containing WD-40 domains, Fbls containing leucine-rich                            |
|                     | repeats, and Fbxs containing either different protein-protein interaction modules or no                            |
|                     | recognizable motifs. FBXW5 contains WD-40 domains, in addition to an F-box motif, so it                            |
|                     | belongs to the Fbw class. Alternatively spliced transcript variants encoding distinct isoforms                     |
|                     | have been identified for this gene, however, they were found to be nonsense-mediated mRNA                          |
|                     | decay (NMD) candidates, hence not represented.   |
| Gene ID:            | 54461  |
| Application Details |  |
| Application Notes:  | IF(IHC-P) 1:50-200   |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Liquid   |
| Concentration:      | 1 μg/μL  |
| Buffer:             | Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.        |
| Preservative:       | ProClin  |
| Precaution of Use:  | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only. |
| Storage:            | -20 °C   |
| Storage Comment:    | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.                                  |
| Expiry Date:        | 12 months  |
