Datasheet for ABIN2814354 anti-IFT57 antibody (AA 331-429) (Alexa Fluor 594)

Overview

Quantity:	100 µL
Target:	IFT57
Binding Specificity:	AA 331-429
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This IFT57 antibody is conjugated to Alexa Fluor 594
Application:	Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p))

Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human HIPPI
lsotype:	lgG
Cross-Reactivity:	Human, Mouse, Rat
Predicted Reactivity:	Dog,Cow,Horse,Rabbit
Purification:	Purified by Protein A.
Target Details	
Target:	IFT57
Alternative Name:	HIPPI (IFT57 Products)

Target Details	
Background:	Synonyms: Dermal papilla derived protein 8, Dermal papilla-derived protein 8, DERP 8, DERP8,
	Esrrbl 1, Esrrbl1, ESRRBL1 protein, Estrogen related receptor beta like 1, Estrogen related
	receptor beta like protein 1, Estrogen-related receptor beta like 1, Estrogen-related receptor
	beta-like protein 1, FLJ10147, Hip1 Interacting Protein, HIP1 interacting protein HIPPI, Hip1
	protein interactor, HIP1-interacting protein, HIPPI, Huntingtin interacting protein 1 interacting
	protein, Huntingtin interacting protein 1 protein interactor, Huntingtin-interacting protein-1
	protein interactor, T 57, t57, T57_HUMAN, Intraflagellar transport 57 homolog Chlamydomonas,
	Intraflagellar transport 57 homolog, Intraflagellar transport protein 57 homolog, MHS4R2,
	Vestrogen related receptor beta like 1, Vestrogen-related receptor beta like 1, CDNA FLJ10147
	fis clone HEMBA1003369.
	Background: Programmed neuronal cell death is a feature of neurodegenerative disorders such
	as Alzheimer's and Huntington's disease, which occur later in human life. Huntington?s disease
	at the molecular and cell level is characterized by polyglutamine expansion of the protein
	huntingtin (Htt) that leads to apoptotis-mediated neurodegenerative loss of medium spiny
	neurons throughout the striatum. Polyglutamine expansion reduces the level of association
	between Hip-1 and Htt, thereby increasing levels of free Hip-1 that then can be the candidate
	protein Hippi (Hip-1 protein interactor). The Hippi-Hip-1 heterodimer is a pro-apoptotic complex
	that recruits procaspase-8 and initiates caspase-8 activation, which may contribute to the
	neuronal cell death observed in individuals diagnosed with Huntington?s disease. The human
	hippi gene maps to chromosome 3q13.13 and encodes a 429 amino acid protein.
Pathways:	Hedgehog Signaling, Positive Regulation of Endopeptidase Activity
Application Details	
Application Notes:	IF(IHC-P) 1:50-200
	IF(IHC-F) 1:50-200
	IF(ICC) 1:50-200
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Format:	Liquid

Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and
50 % Glycerol.

Concentration:

Buffer:

1 μg/μL

Handling

Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
Expiry Date:	12 months
