

Datasheet for ABIN284653

**anti-NEURL antibody (Extracellular Domain)**[Go to Product page](#)

## Overview

|                      |                                                   |
|----------------------|---------------------------------------------------|
| Quantity:            | 500 µL                                            |
| Target:              | NEURL                                             |
| Binding Specificity: | Extracellular Domain                              |
| Reactivity:          | Human                                             |
| Host:                | Mouse                                             |
| Clonality:           | Monoclonal                                        |
| Conjugate:           | This NEURL antibody is un-conjugated              |
| Application:         | Immunofluorescence (IF), Immunoprecipitation (IP) |

## Product Details

|               |                                                                                            |
|---------------|--------------------------------------------------------------------------------------------|
| Immunogen:    | Neu antibody was raised in mouse using Intact SKBR-3 breast cancer cells as the immunogen. |
| Clone:        | N24                                                                                        |
| Isotype:      | IgG1                                                                                       |
| Purification: | purified                                                                                   |

## Target Details

|                   |                                                                          |
|-------------------|--------------------------------------------------------------------------|
| Target:           | NEURL                                                                    |
| Alternative Name: | Neu ( <a href="#">NEURL Products</a> )                                   |
| Molecular Weight: | 185 kDa (predicted detection band MW)                                    |
| Pathways:         | <a href="#">Notch Signaling</a> , <a href="#">EGFR Signaling Pathway</a> |

## Application Details

|                    |                                                                                            |
|--------------------|--------------------------------------------------------------------------------------------|
| Application Notes: | IP: 2 µg/mg protein lysate<br>Optimal conditions should be determined by the investigator. |
| Restrictions:      | For Research Use only                                                                      |

## Handling

|                    |                                                                                                                                     |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| Concentration:     | Lot specific                                                                                                                        |
| Buffer:            | Antibody purified from Ascites fluid by Protein G Chromotography and supplied in 10 mM PBS, pH 7.4, with 0.2 % BSA and 0.09 % NaN3. |
| Preservative:      | Sodium azide                                                                                                                        |
| Precaution of Use: | This product contains Sodium Azide: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.             |
| Storage:           | 4 °C                                                                                                                                |
